Radio personality and tech guru Aki Anastasiou will be headlining AMASA's February forum next week to discuss the gadgets and technologies unveiled at the recently held CES (consumer electronics show) Las Vegas 2014 event and their impact on the media landscape.

"The role of technology in media changes on an almost daily basis, and it's imperative that the industry keeps abreast of the latest tools and devices and how they're going to affect our industry," says AMASA Chairperson Lyn Jones.

Members and non members are invited to join the presentation at no cost which will be followed by a Q&A session.
