

Pembrolizumab gets regulatory go-ahead

MSD's cancer drug, [Pembrolizumab](#), has received regulatory approval by the Medicines Control Council (now South African Health Products Regulatory Authority) in South Africa.

This followed agreement with the Department of Health that the application complied with the criteria for fast-track review. Breakthroughs in immuno- oncology provide healthcare practitioners and patients with new options to treat cancer that did not exist before.

MSD has an extensive immuno-oncology clinical research programme, which currently involves more than 550 trials studying Pembrolizumab across a wide variety of cancers and treatment settings. MSD is currently working on making Pembrolizumab (trade name Keytruda) available to patients in early 2018.
