

# MetroWired announces its premium new location at The Country Club Estate, Woodmead

Issued by [MetroWired](#)

31 May 2020

MetroWired (Pty) Ltd, announces the purchase of its first building, MetroWired House, based at the Country Club Estate in Woodmead, Sandton. Since its two year lease in Waterfall, the company has expanded beyond capacity, warranting bigger and better premises to accommodate the shareholders' vision for future growth projection.

The two-level office space can house up to 60 employees on the ground floor in a spacious open-plan setting, with five fully connected boardrooms, indoor and outdoor recreational areas and four private office spaces. The elite top floor houses elite executive office suites, with a roundtable boardroom, an exclusive cigar lounge, and a rooftop patio and bar area that comfortably serves as a function venue for up to 50 guests.

The new location is situated in a prime real estate area, with easier access to transportation and local amenities for employees. Group CEO of MetroWired, Mr. Musa Nkosi says: "This new space supports the formation of new teams that are developing within the company to serve more precise needs. Creating a space that supports an evolving team atmosphere and accommodates the new technologies we are starting to work with is an important step for the development of MetroWired."

With the operational allowances that the new location allows, MetroWired is set up for success and looks forward to realising its future goals in this exquisite new setting.
