

Gumtree South Africa launches new homepage

One of South Africa's largest classifieds sites, Gumtree, has launched a new homepage which boasts several new and improved features. These features include trending ads, activity card notifications, as well as a search bar and location recognition improvements for mobile devices.

The redesign of the site follows the introduction of ProTool in 2016 – a professional dashboard for property agents, automotive dealerships, recruiters and professional sellers.

Users can contact help.gumtree.co.za for assistance with the new site via live chat.
