

FNB releases eWallet Guide

FNB has released a eWallet Guide for its customers as a credit card-sized Z-Card, produced by PocketMedia Solutions. It explains how to use their cellphone to access money at an FNB ATM and how to use their Visa card to access money at an FNB ATM.

The content of the Z-Card includes frequently asked questions, security tips, pricing information, terms of use for eWallet holders and other services that customers can make use of via their cellphone or Visa card.

Even if customers don't have a bank account, their money can be transferred instantly to their cellphone or Visa card and, where they were used to being paid by cash or cheque, they can now also be paid electronically with FNB e Wallet.
