

Hambani Technologies partners with Hotelogix

Hotelogix is proud to announce a partnership with Hambani Technologies as their channel partner for reselling cloud-based property management system (PMS) to the hospitality industry in South Africa.

Hambani Technologies earlier provided consultation, support and implementation of Legacy systems to the hospitality industry in Africa, South of the Sahara. Due to the new technologies available and the direction of the future, Hambani Technologies has recognized the value additions of switching over to cloud-based solutions, thereby partnering with Hotelogix.

Hambani Technologies, based in Johannesburg, is an IT service providers for companies and hospitality properties in South Africa, and is well known throughout the country for the business solutions they provide for their clients.

Lwazi Khoza from Hambani Technologies states: "The future of technology is in cloud-based solutions. As opposed to a Legacy solution, Hotelogix is more cost effective, easier to get started, and offers better online support since they are available 24/7. We believe in finding the best technology and value-for-money solutions for our clients, and that's why we switched over to Hotelogix."

The benefits of using cloud-based solutions, especially for small and mid-sized hospitality properties, outweigh anything that a Legacy system can offer. Aditya Sanghi, CEO and Co-founder, Hotelogix states, "Today, hoteliers across the world are switching to cloud to run their business better and bring definite advantages for themselves. Working in partnership with Hambani Technologies, we at Hotelogix, want hotels in South Africa to leverage the benefits of a cloud-based hospitality solution."

Hotelogix and Hambani Technologies are committed to provide the best business solutions for their clients. Together, they shall enable the small and mid-sized hospitality sector in South Africa to maximize their businesses with the right tools and systems, and enhance their clients' global presence.
