

F-Type Jaguar roars into SA with powerful Ingenium four-cylinder engine

With the most powerful four-cylinder engine ever fitted a Jaguar, the all-aluminium two-seat F-Type has roared into South Africa.

Jaguar F-type

The new 2.0-litre turbocharged Ingenium engine offers outputs of 221kW and 400Nm propelling the car from a standstill to 100km/h in just 5.7 seconds – and on to a top speed of 250km/h.

Launched at the Kyalami Grand Prix Circuit, the new entry point into the F-Type range had an opportunity to show off its sports car DNA. The model is 52kg lighter, and combined with bespoke chassis tuning, it offers drivers enhanced dynamics and agility.

Customers can build their own F-Type using the [Jaguar Configurator](#). All new vehicles come with a five-year/100,000km service plan, maintenance plan and warranty, as standard.

The model completes the 2018 model year F-Type lineup, joining the 423kW supercharged V8 F-type SVR, 405kW F-Type R, 294kW F-Type 400 Sport, 280kW F-Type S and 250kW F-Type– in both coupé and convertible body styles, as well as the R-Dynamic trim level.
