PaySpace integrates with Xero

PaySpace, online payroll and human capital management software solution company, has announced their integration with Xero, a global cloud-based accounting software company that enables users to log in anytime, anywhere on a Mac, PC, tablet or phone and see up-to-date financials.

The partnership will allow users the option to map the chart of accounts data from Xero into the PaySpace when configuring their GL setup. PaySpace will be going live with a module to automagically integrate their general ledger with Xero's accounting products.
