

Nosa Group completes Deltamune Group's laboratory business acquisition

After reaching an agreement, Nosa Group has completed its acquisition of Deltamune Group's laboratory business. The acquisition follows the acquisitions in 2018 of the CSIR laboratory business and the Aspirata Laboratories business.

This new acquisition allows Nosa Testing, Inspection and Certification (TIC) to broaden its geographical reach and the scale and scope of its services. The Nosa TIC business offers extensive technical expertise with regard to Testing (Microbiological, CO₂, Occupational Hygiene and Chemical analysis), Inspection (Process and Retail Food and Occupational Health and Safety audits) and Certification (ISO 22000/FSSC 22000 certification).
