

Domestly extends professional cleaning services app to Johannesburg

Domestly, founded by Berno Potgieter and Thatoyaona Marumo, utilises app technology to connect homeowners to a professional on-demand cleaning service, at affordable rates.

Launched in Cape Town, the Domestly app (available on Android and iPhone) has extended to include Johannesburg North (Rosebank, Fourways and Sandton) with near-future plans to become available in Pretoria, Midrand and Centurion followed by KwaZulu-Natal by the end of the year.

It allows users to quickly browse profiles of available professional cleaners in their area and then immediately book and pay for the service. Whether it is spring cleaning, the aftermath of 'that' dinner party, the day's notice you receive from unexpected houseguests or whenever you just need an extra 'pair of hands', Domestly can assist

with such occasions by connecting busy people to reliable cleaning professionals.

Domestly recently scooped the Best Consumer App and overall MTN App of the Year 2016 award, from over 450 entries. The MTN App awards celebrate out-of-the-box thinkers that provide real solutions for real world problems, which is what Domestly has achieved.

Launched towards the end of 2015 in Cape Town, it has since facilitated the creation of over 600 sustainable jobs with this number growing steadily as the footprint of the app extends. Within the next year, Domestly has forecasted bringing an additional 1,500 professional cleaners on board.

The Domestly app is free to download for both user and cleaner or cleaning company. All payments for services are conveniently handled within the app via credit card, as well as an option to pay by ETF.
