

DNV GL, NDS sign MoU, expand collaboration partnership

Norwegian global assurance provider DNV GL and South Korean food and beverage company Nongshim's IT subsidiary Nongshim Data System (NDS) have extended their digital assurance solutions collaboration. The two companies will continue their development of digital assurance solutions, which targets food safety and traceability in the food and beverage industry.

NDS brings to the partnership relevant IT solutions including sensors, tags, mobile applications, blockchain and cloud solutions. While the Norwegian global assurance provider DNV GL brings its 150 years of experience in audits, verification and assessment services, including data validation and experience in supply chain management and the food and beverage value chain.

The MoU agreement was signed during the annual Global GFSI Food Safety Conference.
