

Cut coding errors from the supply chain

Issued by [Pyrotec](#)

4 Nov 2020

Packaging or labelling waste, rework, reputational damage and regulatory fines are some of the outcomes, besides cost, that result from human error in coding and marking operations. Correct coding is important for ensuring the supply chain operates efficiently and provides retailers and customers with important product information.

Because of this, manufacturers need solutions for removing operator errors from creeping into production lines, for reducing waste, and minimising brands' reputational damage because of recalled products, among other things.

To do this, Pyrotec PackMark offers CoLOS® software applications from Markem-Image that are engineered to complement its coding equipment. "CoLOS® software allows our customers to integrate equipment networks throughout the production line into one central system. By standardising data input, human error is reduced. This saves time, improves production flow, and drastically reduces long-term costs," explains Brandon Pearce, Pyrotec PackMark's General Manager.

"CoLOS® offers software options that meet every end-of-line production requirement, including packaging coding, message design, the management of complex labels and codes, and the ability to operate multiple printers from one platform," Pearce adds.

CoLOS® provides real-time data about production processes by linking production plans to individual printers on the line. It also monitors the productivity and efficiency of each machine, and automates the selection of data for printing, reducing the need for human intervention. In turn, this reduces the risk of operator errors and provides accurate performance reports.

Pyrotec

Pyrotec is a proudly South African company with its focus aimed firmly on the future. Its five brands - Pyrotec PackMark, Pyrotec PackMedia, Pyrotec PackLink, Pyrotec PackWorx and Pyrotec Finance - make this an industry-leading company that specialises in a comprehensive range of coding and labelling equipment, on-pack informational and promotional devices, merchandising solutions, development and manufacturing of automated systems for the packaging and manufacturing industry and making finance options available to customers. Pyrotec's software offering ensures product integrity, optimises coding activities, and helps secure centralised data management systems and label tracking systems.
