

Publishing inaccurate information across the digital ecosystem is like taking 5 steps back!

Issued by [Location Bank](#)

10 Feb 2021

It's one thing to create a wide presence across all digital endpoints so users can find you anywhere they search. But it's an entirely different story trying to ensure this presence is accurate and consistent from one endpoint to the next. What you need is expert help.

Location Bank filters your data through our **proprietary 4-tier cleansing process** to ensure **100% location integrity**, underlying our ethos of never sending your customers to the wrong location (sadly, this happens more often than you'd think without professional location cleaning like we offer). Part of this 4-tier process also includes what could be a time-consuming task of formatting your data to each endpoints' specific standards. Next, **we mirror your now-flawless data across hundreds of major digital platforms**.

That's what goes into a successful presence! Isn't it time you invested in one? **Click below** for more info on how we create a flawless digital presence for brands like yours.
