

The Mpact hard hat face shield: protecting your workforce

Issued by [Mpact](#)

3 Jun 2020

The safety of our communities, and those who help build them, are a top priority for us at Mpact. We have launched a face shield, specially designed to attach to a hard hat, in support of the construction and related industries.

Our hard hat face shield, produced from PET, a recyclable material, is designed for comfort and practical use within the construction and related industries.

It weighs a mere 34g, offers full facial cover, and is comfortable. The hard hat face shield is suitable to use with safety goggles and over masks. Although easy to clean and re-use, it may be used as a disposable unit.

Other shields in our range include the adult and kids face shields that are respectively designed as a 'one size fits all' but can be further tightened by using an elastic band between the two loops at the back of the headband.

We will soon be launching a face mask too.

Our timeous innovation is another way in which we are trying to do our part in fighting this pandemic, helping reduce the spread of the disease and keeping our communities safe.

The Face Shield has not been subject to independent testing, certification nor approval processes. It is not and should not be considered to be approved or certified as personal protective equipment. Nor is the Face Shield an approved medical device. Measures have been taken to assess the risks associated with the use of the Face Shield and to provide information to the wearer on how to use the Face Shield safely.

The Face Shield must be used only as an additional tool to assist in the protection from droplet spread and must be used in conjunction with all other medically advised control measures including social / physical distancing, hand washing, increased surface cleaning and respiratory hygiene.

Mpact does not provide any guarantee, promise, undertaking or indication of any nature whatsoever to the wearer of the Face Shield, nor does it assume any liability for any risks associated with the use of the Face Shield by the user including but not limited to the risk of contracting COVID- 19.

When wearing the Face Shield, the following health and safety protocols must be observed on each occasion that the Face Shield is used:

- it is recommended that each Face Shield is intended for single use only;
- the Face Shield should be sterilised by the wearer before being used. This must be done if the Face Shield is used in a high risk environment, such as a health care facility or around persons with underlying conditions or the aged.

About Mpact

Mpact is the largest paper and plastics packaging and recycling business in Southern Africa with customers that include packaging converters, fruit producers, FMCG companies and other consumer and industrial packaging companies. Mpact's integrated business model is uniquely focussed on closing the loop in plastic and paper packaging through recycling and beneficiation of recyclables. Mpact has 43 operating sites, 21 of which are manufacturing operations, located in South Africa, Namibia and Mozambique. Sales in South Africa accounted for approximately 87% of Mpact's total revenue for the current period, while the balance was predominantly to customers in the rest of Africa. Mpact Operations (Pty) Ltd, the major subsidiary of the Group is a B-BBEE Level 1 contributor.

Mpact Plastics is a leading producer of rigid plastic packaging and cling film in southern Africa. We operate out of nine production centres across the country, providing packaging from plants with relevant certifications. We service the food, beverage, personal care, home care, pharmaceutical, agricultural and retail markets. In upholding company values, and as a supporter of the circular economy, we positively contribute to industry associations, enabling various communities to participate in recycling solutions.
