

ASCN and WARIMA enter partnership

The Africa Science Communication Network (ASCN) has entered a memorandum of understanding agreement with the West African Research and Innovation Management Association (WARIMA). This partnership is to be focused on research development across the continent.

The ASCN and WARIMA partnership will allow the organisations to reach the intended stakeholders even more with publications and communications of their members while also providing them with needed research support services at a cost cutting rate. It will also allow both organisations to meet their development agendas.
