

Toyota SA updates Quantum, adds driver guard to Ses'fikile

Toyota South Africa introduced an upgraded driver guard to the Ses'fikile commuter in response to the prevailing Covid-19 operating conditions and has implemented a few updates to the Quantum.

Source: motorpress.co.za

The Quantum range now has exterior upgrades on selected models. The GL bus inherits 16" alloy wheels shod with 235/65-R16 tyres - replacing the previously-employed steel versions, while also standardising the wheel size between 11 and 14-seater models.

A new upgraded rear-view mirror incorporates an auto-dimming function - electro-chromatic, as well as a reverse camera display. The Panel Van and Crew Cab derivatives have the auto-dimming rear-view mirror and reverse camera upgrade as well.

Based on market response and customer feedback, Toyota SA has reportedly reduced the number of derivatives within the Panel Van and Crew Cab ranges. The non-air-conditioned models have been discontinued while the Crew Cab line-up has been simplified by deleting the rear air-conditioned version from the line-up.

Quantum pricing
