Human vs AI Moot Court

Jaw not only focuses on senior arbitration practitioners but also includes topics to enhance the knowledge and professional growth of future industry leaders. One of the highlights of the event, hosted by Young AFSA, is the Human vs Artificial Intelligence (AI) Moot Court, where humans will be pitted against AI and delegates at the conference will be the judge of who, or what, delivers the best judgment.

Jaw 2024 aims to set the benchmark for knowledge-sharing and collaboration within the arbitration fraternity, leading the standard for arbitration across the African continent and beyond.
