

See: Lexus launches new ES

Lexus has launched the world premiere of its new ES. The ES is known by many customers around the world for its high level of quietness, high-quality ride comfort, and spacious cabin.

The new ES main features include improved quietness and ride quality and an evolved driving performance as well as further refinements to its high-quality overall comfort.

Its exterior has newly designed headlamps, newly designed wheels and new colours. The interior has a multimedia system that features a touch display with a glass screen for improved visibility and operability.

The vehicle can be locked and unlocked with a Bluetooth-activated digital key by operating using only a smartphone installed with a dedicated app.

The new minor change ES range will comprise three model derivatives which Lexus SA will announce together with spec details at launch in quarter four this year.
