

SME South Africa makes it easier for business owners to buy business solutions

Issued by [SME South Africa](#)

7 Jul 2021

[SME South Africa](#) announced on Friday, 2 July, the expansion of its online platform with the introduction of a powerful e-commerce solution. SME South Africa is a content hub that provides entrepreneurs with business tools and resources to further develop their businesses.

The new launch enables small business owners to purchase tech and other business solutions such as business financing and insurance.

“Our vision has always been to build a one-stop-shop resource platform for SMEs in South Africa,” says Velly Bosega, digital media entrepreneur, who founded SME South Africa in 2014.

“We now offer more than just inspirational content, we have found more simple ways for SME owners to access funding and have introduced product and service review guides that empower business owners in making informed decisions when buying a new tech product or service.”

New e-commerce platform makes it easier for business owners to buy the right tech solutions

Providing access

The new SME South Africa makes it easier for small business owners to make major purchases for their businesses. “Whether you need accounting software to make it easier to keep track of your finances or financing to expand your small business, we know how confusing and time-consuming the buying process can be,” says Bosega.

To help business owners to make the best choice, they can access reviews of some of the biggest brands and compare features and cost using a powerful comparison feature.

Below are the business solutions business owners can review, compare and buy on SME South Africa.

- [Business loans](#)
- [Business insurance](#)
- [Accounting software](#)

Closing the gap

Entrepreneurs face many challenges including access to financing and limited use of technology.

Many business owners don't use technology in their businesses and as a result are missing out on its major benefits such as access to new markets, reduced business costs and improved efficiency and competitiveness. This is according to the SME South Africa white paper report, [*Advancing Technology Use Among South African SMEs to Accelerate Growth*](#).

Similarly, while funding plays a considerable role in the growth and survival of any small business, 93% of SME owners surveyed in the SME South Africa Landscape Report, [*An Assessment of South Africa's SME Landscape: Challenges, Opportunities, Risks and Next Steps*](#), are actively looking for funding and are failing, mostly because entrepreneurs find it difficult to access financing.

SME South Africa seeks to close this gap by offering a practical, and easy to use way to get all the business solutions and services business owners need.

About SME South Africa

SME South Africa is a one-stop shop for business owners to access advice, business tools and resources they need. We bridge the gap by connecting small business owners and brands through strategic content, data and results-driven advertising solutions.
